Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The frame house is a two-story frame structure constructed in a rectangular plan. It is three-bays by two-bays on a high stone foundation. The main facade is symmetrically arranged with a central entrance and three-bay one-story porch. The structure has a gable roof with a molded cornice. The structure appears to date from the mid-19th century.

The property is located on the north side of Sandy Hook Road, approximately .16 mile west of Clark Road, in Sandy Hook. The house sits fairly close to the road. The main facade faces south.

The two-story structure is constructed of frame covered in a diamond-shaped asphalt shingle. The house sits on a high stone foundation and has a full story on the main facade. The main facade is symmetrically arranged with a central entrance. One-over-one sash windows are in the outer bays of the first story and in the three bays of the second story. These windows have plain trim with a pointed-arch cornice. One-over-one sash windows are in the bays on the gable ends with a flat cornice. The front porch has a flat roof with a paneled frieze. Modern aluminum porch supports are in the front of the house; however post pilasters are on the back part of the porch that show the design of the original posts. The porch sits on brick piers and has a set of concrete stairs in the front. The east gable end has an exterior-end concrete block flue. An interior-end brick chimney rises from the west gable end. The roof has a molded cornice and is covered in sheet metal.
